OFFICE OF THE
CHAIRMAN

The Honorable John G. Kemeny
Chairman
President's Commission on the Accident
at Three Mile Island
2100 M St., N.W.
Washington, D.C. 20037

Dear Mr. Chairman:

My letter of June 25, 1979, included a response to question IV of the questions raised at our meeting of April 26. Enclosure 2 of that response contained notes and memoranda from the Office of Nuclear Reactor Regulation concerning the production of hydrogen and oxygen in the reactor coolant system after the accident. A memorandum dated April 25, 1979 that provides further information on that subject was overlooked in the staff's original file search to assemble enclosure 2. The memorandum is enclosed here and should be added to enclosure 2 of the response to question IV.

Sincerely,

Joseph M. Hendrie
Chairman
