In reply to your letter of February 27, 1979, we were not informed of the requirement to test the Kay Ray Model 7062, used to measure flow on a conveyor belt, for leakage at six-month intervals. A testing device has been requested for the 1979-80 budget. Meanwhile, a scanner will be borrowed to accomplish the next inspection.

I wish to commend Mr. Mustain on the way he conducted the inspection. It is my opinion that he is a great asset to your organization.

Yours truly,

William R. McIntyre
Plant Operations Superintendent
