

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

JUN 18 1979

DOCKET NOS. 50-369
AND 50-370

APPLICANT: DUKE POWER COMPANY

FACILITY: MCGUIRE NUCLEAR STATION, UNITS 1 AND 2

SUBJECT: SUMMARY OF MEETING HELD ON JUNE 8, 1979

A meeting was held with the applicant on June 8, 1979 in Bethesda, Maryland to discuss the McGuire Radiological Effluent Technical Specifications. A list of attendees is provided in the Enclosure.

The purpose of the meeting was to discuss the draft Radiological Effluent Technical Specifications (RETS) and the Offsite Dose Calculation Manual (ODCM) submitted December 18, 1978 (revised March 23, 1979) and January 25, 1979, respectively. The staff informed Duke that more information was required to identify their use of radwaste equipment, their process control program for solidification and their monitoring programs. The applicant agreed to provide:

1. Meteorology data background to the Hydrology/Meteorology Branch.
2. Details on the Condensate Cleanup System collection tank to the Effluent Treatment Systems Branch, and
3. Process Control Program for Solidification to the Effluent Treatment Systems Branch.

The staff provided revised Radiological Effluent Technical Specifications, (RETS) including sections that should be incorporated in the Standard Technical Specifications for McGuire. The staff (Radiological Assessment Branch) will provide additional guidance on a specification for thermoluminescent dosimeter area monitoring around the facility. Other significant items discussed, that will require additional correspondence are as follows:

1. Solidification - Can the definition exclude low level radioactive wastes (wet resin and filters) in the compressed state? The Effluent Treatment Systems Branch will inform Duke.
2. P-32 and Fe-55 analysis - Can the analysis be performed by an effective surveillance program? Duke will inform Radiological Assessment Branch.

(5)

JUN 18 1979

3. Frequent three quarters (Specifications 3.11.1.2, 3.11.2.2 and 3.11.2.3) -
Can this period be changed to the remainder of the calendar? The Effluent
Treatment Systems Branch will inform Duke.

The applicant will review the revised Radiological Effluent Technical Specifications and resubmit his proposal on July 6, 1979 to follow with a revised Offsite Dose Calculation Manual in mid-August. His submittal of the solidification process control program is subject to the vendor's schedule, but should be available about August 1979.
