NOTE TO: D. Ross

SUBJECT: REVIEW CONSIDERATIONS FOR PLANTS HEARING OL DECISION DATE

As discussed in meeting in R. Boyd's office, we are commencing preparation of activities needing attention before OLs are issued, in light of the TMI-2 experience. Within our assigned review areas, we are considering the following aspects.

1. Operator Licensing, including:
 - a. Training Requirements
 - b. Requalification Requirements
 - c. Examination Scope and Content
 - d. Attitudinal Reinforcement
2. Administrative Controls, including:
 - a. Operating Procedure Type and Content
 - b. Emergency Procedure Type and Content
 - c. Lock and Tag Procedure
 - d. Shift Turnover Procedure
3. Quality Assurance for Operations
4. Initial Test Programs, including:
 - a. Preoperational Test Program Results
 - b. Startup Test Program Content
 - c. Overall Program Review
5. Technical Qualifications, including:
 - a. Methods of Determination
 - b. Provisions for Rapid Augmentation

Within each of the above aspects, we shall develop specific items to be settled before OL issuance. When possible, these items will define requirements to be met or actions to be taken; in some cases, they may merely reflect the need for more study. We will have a first cut at this list by the end of this week.

APR 17 1979

For each item, we shall categorize it as:

1. Needing full implementation before OL issuance, or
2. Needing appropriate commitments before OL issuance and short-term implementation, or
3. Needing appropriate commitments before OL issuance and long-term implementation.
