Dr. Roger J. Mattson  
Division of Nuclear Systems Safety  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Dr. Mattson:

Richard Denning of the Battelle Labs in Columbus, Ohio told me that he or Battelle sent to you, at your request, a memorandum on the steam explosion potential in the event of a core or fuel meltdown during the TMI-2 accident. I assume the memo is dated between March 2<sup>nd</sup> and April 27th. Would you be kind enough to send me the entire memo, including any attachments to it that there may have been?

Sincerely,

*Richard E. Webb*  
Richard E. Webb

2858 111 St.  
Toledo, Ohio 43611

*P.S. Also, Mr. Novash wants to send me some documents and form answers to several questions I posted, which Brian Siepl had written down. May I remind your division of these outstanding items.*
