Mr. Harold R. Denton
Division of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Shoreham Nuclear Power Station - Unit 1
Docket No. 50-322

Dear Mr. Denton:

This letter serves to supplement our letter SNRC-361, dated February 28, 1979, delineating the use of newer editions of the code, supplementary addenda, and code cases in lieu of the base code. Our letter SNRC-361 states in Table 1, Item 4, "As allowed by ASME III 1974, summer 1975 Addenda, Nuclear Steam Supply System field welds have been exempted from PWHT." This statement should be clarified such that the 1974 Edition of ASME III with Addenda through summer 1975, Subsections NB, NC and ND Paragraphs NB 4620, NC 4620, and ND 4620 shall be allowed for use at the Shoreham Nuclear Power Station.

This change has been reviewed and approved by LILCO, by our engineering and installation agents and by the independent code inspection agency, Hartford Steam Boiler Company, and was incorporated into the appropriate design specifications and installation documentation at the time of its implementation.

Very truly yours,

J. P. Novarro
Project Manager
Shoreham Nuclear Power Station
