PROPOSED RULE PR-Misc Notice
Reg Guides

June 6, 1979

Green Bay, Wisconsin
Joliet, Illinois

Secretary of the Commission
United States Nuclear Regulatory Commission
Washington, D. C. 20555

ATTENTION: Docketing and Service Branch

SUBJECT: Proposed Revisions to Regulatory Guide 1.5 (RS 807-5)

Gentlemen:

In regards to your letter dated May 21, 1979, we feel the proposed revisions to the subject regulatory guide should include specific address of subcontractor personnel including:

1. Repair, revision, maintenance and modification subcontractor staff organization and adequacy.
2. Subcontractor staff qualifications.
3. Subcontractor interface with licensee's technical support staff.
4. Subcontractor surveillance by licensee.
5. Subcontractor organizational and technical infrastructure acceptability.

The area of contractor/subcontractor and licensee involvement, especially on projects involving operating plants, is one which needs more attention.

Sincerely,

Gary L. Marquardt
