NRC PUBLIC DOCUMENT ROOM

June 7, 1979

Secretary of the Commission
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555
U. S. A.

Attention: Docketing and Service Branch

Dear Sirs,

We have received the Regulatory Guide Distribution List (Division 1), May 21, 1979 from Mr. R. B. Minogue, Director Office of Standards Development and we understand the NRC is evaluating the qualifications of nuclear power plant personnel as a part of the review of the accident at the Three Mile Island Nuclear Station Unit 2.

We would like to reevaluate the proposed Revision 2 to Regulatory Guide 1.8, "Personnel Selection and Training" and make comments on it if any. We will send our comments to you later.

Thank you for your cooperation.

Best regards,

Very truly yours,

Kunishige Hashimoto
Managing Director
General Manager
Nuclear Project Division
