Subject: C-E DESIGNED PLANT OWNERS GROUP ON POST TMI EFFORTS

Dear Mr. Denton:

Electric utilities who own Combustion Engineering designed nuclear steam supply systems under construction or operating along with Combustion Engineering, have been conducting evaluations of their plants in light of the events at Three Mile Island, Unit #2. At a meeting on July 13, 1979, it was decided that an Owners Group would be formed to address itself to these efforts and also that the ongoing bulletin response efforts of the C-E Operating Plants Owners Group would be incorporated into the new organization, so that there would be only one TMI related Combustion Engineering Plants Owners Group.

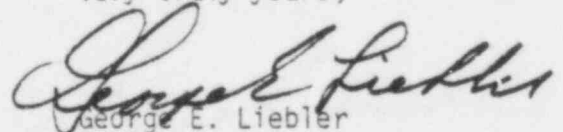

The Owners Group consists of the Owners Group utility representatives, a Steering Committee and several subcommittees. Combustion Engineering has designated a Project Manager to assist in the Owners Group work.

Since the Owners Group has very recently been organized, the scope of work has not been fully defined. I will keep you advised as projects are undertaken and results obtained. I have been elected Chairman of the C-E Designed Plants Owners Group on Post TMI Efforts and designated as the contact with the NRC on Owners Group activities. Since I was also the Chairman of the Operating C-E Plants Owners Group and that group's activities are still ongoing with your staff, I remain the contact for that group also.

If you have any questions or comments, please contact me at (305) 552-3811.

I am looking forward to working with you and your staff.

Very truly yours,

George E. Liebler
Chairman
C-E Owners Group
