Silver Spring, MD 20910

Gentlemen:

As specified in Condition 25 of Amendment No. 6 to Special Nuclear Material License No. SNM-777, UNC Recovery Systems has prepared a proposed waste management plan to decommission the process waste lagoons licensed at the Wood River Junction facility, and to provide for continuing disposal of wastes generated from plant operation. That plan is attached for your information.

Of necessity, the plan is broad in scope due to its dependence upon successful technical evaluation of process and equipment capabilities. If you have any questions concerning this plan, please contact us.

Very truly yours,

UNC Recovery Systems

C. E. Bowers
