DOCKET 50-155 - LICENSE DPR-6 -
BIG ROCK POINT PLANT - RESPONSE TO
IE BULLETIN 79-11: FAULTY OVER-
CURRENT TRIP DEVICE IN CIRCUIT
BREAKERS FOR ENGINEERED SAFETY SYSTEMS

NRC letter dated May 22, 1979 forwarded the subject Bulletin. The subject Bulletin discussed degradations found in the overcurrent trip devices of two specific Westinghouse circuit breaker designs. Consumers Power Company was requested to determine if circuit breakers of these designs were in use at Big Rock Point and, if so, to take specific actions to address overcurrent trip device degradation.

Neither of the two types of Westinghouse circuit breakers cited in the subject Bulletin are in use at Big Rock Point.

David P Hoffman
Assistant Nuclear Licensing Administrator

CC Director, Office of Nuclear Reactor Regulation
Director, Office of Inspection and Enforcement
