Gentlemen:

We hereby submit by reference "CEN-114-P - Review of Small Break Transients in Combustion Engineering NSSS's". This document was submitted to you by letter dated July 16, 1979, G. E. Liebler (Chairman, CE Owners Group) to R. W. Reid. The above submittal is in partial response to your letter of June 5, 1979, and is applicable to Arkansas Nuclear One-Unit 2. We wish to point out that ANO-2 does not have a PORV in its design and has a safety grade Emergency Feedwater System which conforms to Branch Technical Position 10-1.

Very truly yours,

David C. Trimble
