UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20585

JUL 9 1979

Docket No: 50-461

APPLICANT: Illinois Power Company (IPC)
FACILITY: Clinton Nuclear Power Station, Unit 1
SUBJECT: SUMMARY OF MEETING HELD ON JUNE 29, 1979 TO DISCUSS FORECAST PANEL'S FINDINGS FROM ITS JUNE 12, 1979 SITE VISIT

A meeting was held with the applicant on June 29, 1979 to discuss the Forecast Panel's findings as a result of its site visit of June 12, 13 and 14, 1979 to the Clinton Nuclear Power Station, Unit 1. A list of attendees is provided in the Enclosure.

We informed the applicant, that based on our previous discussions with representatives of IPC during the above cited site visit we estimated that the construction was approximately 32% complete and that our estimated nominal construction completion date was June 1983. The applicant stated that it was their view that construction of Unit 1 was 47.6% complete and their estimated fuel load date was April 1982.

We stated that we would conduct another visit to the site in the latter part of 1979 and review the status of construction of Unit 1. If there were any significant changes observed during our planned site visit that would cause us to change our estimate of the status of construction, we would take appropriate measures to ensure a timely review of the applicant's Final Safety Analysis Report which they intend to submit on December 1, 1979.
