May 29, 1979

Mr. L. C. Rouse, Chief  
Fuel Processing and Fabrication Branch  
Division of Fuel Cycle and Material Safety  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Dear Mr. Rouse:

In the Matter of the Application ) Docket No. 70-2443  
Tennessee Valley Authority

*see receipt*

The Tennessee Valley Authority (TVA) hereby requests a renewal of its special nuclear material license, SNM-1476, dated June 20, 1974, for TVA's Office of Power Central Laboratories. The enclosed application is identical to our original application dated April 15, 1974, except for changes indicated by a vertical line to the right of the lines being changed.

The purpose of these changes is to update our application to reflect personnel and division changes within TVA. The phrase, "or to an approved burial site," on Page 5, item III, C(3), and Page 10, item VIII, F(1), is to give TVA the option to process the waste at any of TVA's nuclear power plants or ship it to an approved burial site. The other minor changes are to clarify TVA's original intent of this application.

In accordance with the requirements of 10 CFR 170.31, we have determined this proposed amendment to be Category J. A remittance for \$460 is being wired to the NRC, Attention: Licensing Fee Management Branch.

Very truly yours,

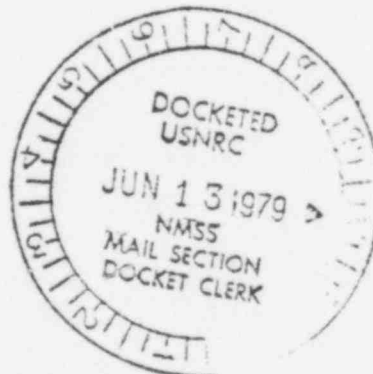

*J. E. Gilleland*

J. E. Gilleland  
Assistant Manager of Power
