Mr. E. A. Trager
Uranium Mill Licensing Section
U.S. Nuclear Regulatory Commission
7915 Eastern Avenue
Silver Spring, MD 20910

Dear Mr. Trager:

Enclosed are additional revisions to Energy Fuels Nuclear's Application for a Source Material License. These modifications are in accordance with instructions received from you by telephone during the week of July 9-13, and at our meeting in Silver Spring on July 12.

As was the case with earlier revisions, vertical bars have been placed in the right margin of each page where changes have been made. To distinguish these changes from earlier ones, the vertical bars in this transmittal, as well as the revision date at the bottom of each page, are indicated by the letter "a". Also included is a sheet of supplemental information regarding changes made on some of the Plates and Tables.

We trust this submittal will complete the necessary additional information to allow our application to be declared complete, and that the Safety Evaluation Report can now be completed and the license granted in a timely fashion. We appreciate whatever effort you can render to expedite the review process.

Sincerely yours,

C. E. Baker, Environmental
& Licensing Director

Energy Fuels Nuclear, Inc.
Revisions to Source Material License Application
July 16, 1979

SUPPLEMENTAL INFORMATION

1. Plate 3.1-3 (Mill Flow Diagram), included herewith, formally was Plate 3.1-1; only a numbering change has occurred on this plate.
2. Plate 3.1-4 has been modified slightly to contain three additional notations: the lined catchment basin is now labeled as is the solvent extraction holding tanks; the words "pre-leach" have been added to the thickener section.
3. Table 5.1.1-1 (Organization Chart) now contains a box labeled "Radiation Technicians".
4. Plates 1-A, 1-B, and 1-C of Appendix AA have been deleted, and appropriate notations have been made in the text of that Appendix.
5. Some of the sampling locations given earlier on the plate in Appendix E were incorrect; a revised Appendix E is included herewith to replace the one transmitted earlier.
