Gentlemen:

This refers to the inspection conducted by Mr. A. G. Januska and Miss R. J. Greer on May 30, 1979, of activities at the Quad-Cities Nuclear Station, Units 1 and 2, authorized by NRC Operating Licenses No. DPR-29 and No. DPR-50 and to the discussion of our findings with Mr. Kalivianakis and others of your staff at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

No items of noncompliance with NRC requirements were identified during the course of this inspection.

We are concerned about the performance of the Jane Lamb Hospital personnel during the emergency drill witnessed by us during this inspection. The enclosed inspection report delineates areas which need improvement. We are also concerned that RMC personnel were involved in the drill as participants rather than as observers. We request that you give these matters your attention and inform us by letter within twenty days of your actions to correct them.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter, the enclosures, and your response to this letter will be placed in the NRC's Public Document Room, except as follows. If the enclosures contain information that you or your contractors believe to be proprietary, you must apply in writing to this office, within twenty days of your receipt of this letter, to withhold such information from public disclosure.
