March 28, 1979

Mr. Harold R. Denton  
Director of Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Denton:

I applaud your wise and strong action in shutting down the 5 reactors on grounds of the questionable safety of some of their pipes.

I hope the criticism you have been receiving for your action will not affect your future judgment. The American public is looking for the NRC to exercise its power for the good and safety of those who live near reactors, not just for the economic good of the utilities hoping to operate nuclear plants for profit.

7907260-749 H  
Sincerely,  
Elizabeth Coleman
