Re: Response to Request for Additional Information: Bluefield Hospital Company LLC d/b/a Bluefield Regional Medical Center (Radioactive Materials License #47-19142-01, Docket No. 030-17038, Control No. 613971)

Dear Ms. Gaskins:

I write on behalf of our client, Bluefield Holdings, LLC (“Seller”). On August 14, 2019, Seller notified the U.S. Nuclear Regulatory Commission (the “NRC”) of a proposed indirect change of control of Bluefield Hospital Company LLC d/b/a Bluefield Regional Medical Center (the “Licensee”), which holds the above-referenced radioactive materials license. The purpose of this letter is to respond to your August 29, 2019, request for additional information (the “Request”) regarding the transaction. Please see below for responses to the questions posed in the Request.

1. Please provide a complete, clear description of the transaction, and include a pre- and post-transaction organizational chart showing the corporate structure of the license holder and its parent companies, if any.

Please see Exhibit A. Based on our conversations with a representative of the NRC, the parties understand that the anticipated transaction constitutes an indirect transfer of control.

2. Please describe any changes in the organization, including but not limited to, transfer of stocks or assets and mergers, change in members on Board of Directors, etc. that will occur as a result of the change of control. Please confirm that the licensee name, mailing address, and contact information, including phone numbers will remain the same.

As described above and in Exhibit A, as a result of the transaction, Seller will transfer its 100% of membership interest in the Licensee to Princeton Community Hospital Association, Inc. (“Buyer”). There will be no transfer of assets, nor will there be any change in the Licensee’s legal name or federal tax identification or Medicare provider numbers. The Licensee will continue to be the owner and licensed operator of the hospital and associated facilities and equipment, pre- and post-Closing. The Officers will change at the time of Closing in that Jeff Lilley will become BRMC’s Chief Executive Officer and Secretary, and Frank Sinicrope will be become its Chief

Financial Officer and Treasurer. PCH may also elect to change some members of the Board of Directors, as well. In the event of such a change, the new Directors will be identified prior to and appointed as of the date of Closing. There will be no change in the Licensee's name, mailing address, or contact information, including (phone numbers).

3. Please describe the status of the licensee's facilities, equipment, and radiation safety program, including any known contamination, at the time of the transfer. Include the status of calibrations, leak tests, area surveys, wipe tests, training, quality control, and related records.

The Licensee's Nuclear Medicine Room is secure and identified as hazardous on the life safety plans. All radioactive sources are sealed and leak tested quarterly by the NPC (National Physics Consultants). The Radiation Safety Program is overseen by the Radiation Safety Officer and meets quarterly. There are no known contaminations. The status of all surveys and tests are up to date and records are kept to reflect last NRC Inspections which was completed in 2018 with no violations.

4. Please confirm that all records concerning the safe and effective decommissioning of the facility will be transferred to the transferee or to NRC, as appropriate. These records include documentation of surveys of ambient radiation levels and fixed and/or removable contamination, including methods and sensitivity.

Please see Exhibit B.

5. Please confirm that both transferor and transferee agree to transferring control of the licensed material and activity, and the conditions of transfer, and that the transferee has been made aware of any open inspection items and its responsibility for possible resulting enforcement actions.

Please see Exhibit B and Exhibit C.

6. Please confirm that the transferee will abide by all constraints, conditions, requirements, representations, and commitments of the transferor or that the transferee will submit a complete description of the proposed licensed program.

Please see Exhibit C.

7. Please have a senior management representative from Princeton Community Hospital Association, Inc. concur with all statements and commitments made in the letter dated August 14, 2019 and the response to this request.

Please see Exhibit C.

8. In order for the NRC to determine if this change of control is to a “known entity,” please indicate if Princeton Community Hospital Association, Inc. possesses any NRC or Agreement State licenses. If so, please provide a copy.

Transferee holds the following licenses and permits:

- **NRC Radioactive Materials License No. 47-16307-01, Docket No. 030-10772**
- **WV Office of Environmental Health Services Registration Nos. 281300, 030101, 551400, 55401, 271000, and 550101.**

Please see Exhibit D for copies of these licenses.

Thank you for your attention to this matter. If you have any questions, please contact counsel for the Company, Emily Morrison, at (615) 252-3570 or emorrison@bradley.com.

Sincerely,

Emily Morrison

Dear Mr. Lilley:

This refers to your license amendment request. Enclosed with this letter is the amended license.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. As requested, we deleted Dr. Kishor Pathak from your license, but we are unable to add Dr. Hrak Chemcherian as an Authorized User at this time due insufficient information provided regarding his credentials. Specifically, Dr. Chemcherian does not fully meet all the requirements for certification from the Certification Board of Nuclear Cardiology. This was discussed during multiple email exchanges and telephone calls during the past two weeks with your physics consultant, Mr. Kelly Stoneberg. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Licensee Toolkits**, see our **toolkit index page**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. Thank you for shipping online with FedEx ShipManager at fedex.com.

Please Note

FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$1000, e.g., jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits; Consult the applicable FedEx Service Guide for details.
The estimated shipping charge may be different than the actual charges for your shipment. Differences may occur based on actual weight, dimensions, and other factors. Consult the applicable [FedEx Service Guide](#) or the FedEx Rate Sheets for details on how shipping charges are calculated.
