Inspection Summary:

Inspection on April 17-20, 1979 (Report No. 70-925/79-02; 70-1193/79-02)

Areas Inspected: Routine, announced safety inspection, including: organization, facility changes and modifications, internal audits, safety meetings, maintenance, conduct of operations, emergency planning, training, procedures, instruments and equipment, exposure control, posting and labeling, surveys, notifications and reports, liquid effluents, gaseous effluents, effluent control procedures, filter testing, solid waste management, IE Notice No. 79-08, and the respiratory protection program. The inspection involved 31 inspector-hours on site by two NRC inspectors.

Results:

No items of noncompliance or deviations were identified and inspected.
