

APPENDIX A

NOTICE OF VIOLATION

Combustion Engineering Incorporated

Docket No. 70-1100

This refers to the inspection conducted by representatives of the Region I (Philadelphia) office at the Combustion Engineering Nuclear Power Systems Plant of activities authorized by NRC License No. SNM-1067.

10 CFR 70.54 requires, in part, that each licensee who transfers and who receives special nuclear material complete and distribute Nuclear Material Transaction Report on Form NRC-741, in accordance with printed instructions for completing the form. The instructions for completing the form require, if delayed measurements of a receipt are to be made, that the measurements be completed within thirty days after the receipt of each shipment. The instructions also require that Limits of Error be entered for each isotope entry.

Contrary to the above, on March 22, 1979, it was determined that receipts shown on Forms NRC-741 ZWQ-ZEF 725, 726, 727, 728, 731, 732, 733, 740, 741, and 742 were not measured within thirty days of receipt and that shipments shown on Forms NRC-741 ZEF-ZWQ 536 and 567 did not show Limits of Error for each isotope entry.

This is an infraction.
