Docket No: 50-320

Mr. Robert L. Long, Manager  
 DATA Reduction and Management Group  
 General Public Utilities Service Corp.  
 260 Cherry Hill Road  
 Parsippany, New Jersey 07054

Dear Mr. Long:

It is requested that two copies of the TMI-2 data collected to date by the GPU DATA Reduction and Management Group be forwarded to the Nuclear Regulatory Commission. An index of this data has already been received. Additionally, two copies of subsequent data and an updated index should be provided approximately every two weeks. This data can be forwarded in the form of microfiche; 20x or 24x is preferred. This material will be used in the continuing investigations by various groups within the Commission.

We recognize that you have already provided some of the collected data, in various forms, to specific staff organizations. It would be convenient to have complete sets of the data for overall Commission use as well as provide an assurance of completeness and a ready resource of reliable information for the Commission's independent Special Inquiry Group investigating the accident at TMI-2. If this request imposes an undue burden upon your office, please call me immediately so that possible alternative courses of action can be considered.

Sincerely,

(Signed) E. Kevin Cornell

E. Kevin Cornell, Deputy Executive  
 Director for Operations

Mr. Robert L. Long, Manager  
DATA Reduction and Management Group  
General Public Utilities Service Corp.  
260 Cherry Hill Road  
Parsippany, New Jersey 07054

Dear Mr. Long:

It is requested that two copies of the TMI-2 data collected to date by the GPU DATA Reduction and Management Group be forwarded to the NRC. An index of this data has already been received. Additionally, two copies of subsequent data and an updated index should be provided approximately every two weeks. This data can be forwarded in the form of microfiche; 20x or 24x is preferred. This material will be used in the continuing investigations by the Commission.

Sincerely,

Roger J. Mattson, Director  
Division of Systems Safety  
Office of Nuclear Reactor Regulation
