Gentlemen:

On May 14, 1979, UNC Resources, Fuel Recovery Systems received notification from your office that the Certificate of Compliance No. 4949 for Radioactive Material shipping container Model UNC-1484 expires on May 31, 1979.

In reviewing the requirement for a consolidated application for renewal, we find that the time it will take to fully comply with all the stated requirements for submission of such an application will significantly exceed the time available between now and May 31, 1979.

For this reason we wish to request an administrative change for a ninety day extension. This would change our expiration date to September 30, 1979 and allow us adequate time to collect the required data and prepare the submittal.

Very truly yours,

R. J. Gregg  
Manager, Quality Assurance
