Sec. U.S. Comm. of Nuclear Regulatory Commission:

Dear Sir: am writing you in regard to

Docket #50-338 & P.

Docket #50-339 - Pump house sinking.
We who live close, 5 miles, to the Nuclear
Power Plant, VEPCO, North Anna,
are deeply concerned about the
possibility that VEPCO may try
to store spent fuel, from surrounding
at the North Anna site - It seems
so dangerous to have extra fuel
stored here. We are already in
a dangerous position - And the
pump house is sinking all the
time - Please give us a little hope
that we can expect some protection
from the Commission -

Acknowledged by card. G/15.96
