Washington, D. C. 20555

Dear Mr. Arndt:

In our phone conversation yesterday you expressed an interest in how we would take care of an adjustment.

Enclosed is a sketch of the device we propose for those situations which require major adjustments.

We have not been called upon to furnish any yet but have made some for demonstration and to answer the same question you are asking.

Thank you for your help on the Topical Report matter.

Very truly yours
