Mr. Charles E. MacDonald
Chief Transportation Branch
US Nuclear Regulatory Comm.
Washington, DC 20555

Dear Mr. MacDonald:

The Ames Laboratory, US Department of Energy at and operated by Iowa State University, Ames, Iowa, 50011 wishes to be registered as a user of Radioactive Material Shipping Cask Model No. LL-50-100. Various shippers will be contracted by the Ames Laboratory to provide transportation and disposal services as the Ames Laboratory Research Reactor is being dismantled. Two of these, Chem-Nuclear Systems, Inc and United Nuclear Corporation have indicated that they will use the LL-50-100 cask, Certificate of Compliance No 6601, Revision No. 3, expiration date Aug. 31, 1979. We are uncertain as to whether the Ames Laboratory as the source of this radioactive material to be shipped must also be registered as a user of this cask. If such registration is required, please consider this an official request for this registration.

Plans are made for a shipment using the LL-50-100 cask to be made by Chem-Nuclear Systems, Inc leaving the Laboratory on May 31 or June 1, 1979, destination Barnwell, SC.

Sincerely yours,

A. F. Voigt
Asst. Director
