ATTENTION: Mr. Glen D. Brown

Gentlemen:

In response to your letter dated April 11, 1979, concerning the results of your inspection on March 27-28, 1979, we are submitting the following explanations and corrective actions.

The infractions and deficiencies described in your Notice of Violation have been given serious consideration. The cause of these problems is merely an oversight. We have, therefore, instituted a new reminder system that will alleviate this type of problem. This new system will be prominently displayed at selected locations and will be monitored by the Assistant Radiation Officer with system follow-up being performed in our Boise, Idaho, office.

Implementation of this system to prevent future occurrences as well as current calibrations, inspections, inventories, etc., will be in full compliance on or before May 8, 1979.

I trust this information will be sufficient to enable you to complete the processing of this inspection. If I can be of further assistance, please do not hesitate to call.

Respectfully submitted,

*Richard T. Kanemasu*  
Richard T. Kanemasu, P.E.
