DOCKET NUMBER
PROPOSED RULE *PR - Time Notice
Reg. Guide*

General Offices: 212 West Michigan Avenue, Jackson, Michigan 49201 (517) 788-0650

May 23, 1979

Secretary of the Commission
Att Docketing and Service Section
US Nuclear Regulatory Commission
Washington, DC 20555

The following comments concerning Regulatory Guide 1.134, Revision 1, "Medical Evaluation of Nuclear Power Plant Personnel Requiring Operator Licenses," are presented for your consideration:

1. The last sentence of Regulatory Position C.1 states that background information submitted by the facility operator "... should be subject to evaluation." This statement should be deleted or as a minimum modified to ensure that information submitted to the medical examiner be considered confidential and not subject to external evaluation.
2. The last sentence of Regulatory Position C.2 requires that if medical examination identifies potentially disqualifying conditions as described by Sections 5.3.8 and 5.4.15 of ANSI N546-1976, evaluation of these conditions be conducted by appropriately licensed professional personnel. This position should be expanded to define personnel appropriately "professionally trained" or to specifically allow a medical examiner referral as acceptably meeting this guideline.

Please consider these comments in future revisions of this Guide.
