June 5, 1979

The Honorable Joseph Hendrie
Chairman of U.S. Nuclear Regulatory Commission
1717 H Street, N.W.
Washington, D.C. 20555

Dear Sir:

I had the privilege of speaking to your secretary, Ms. Elizabeth Jacobs via telephone and as requested, I am submitting this invitation to you.

I have been appointed the General Business Chairman of the 1979 National Wholesale Druggists' Association. We are in the process of developing a business program for our annual meeting to be held in Honolulu, Hawaii, November 3-8, 1979.

We would like to extend a cordial invitation to you to address this group on Thursday morning, November 8th about 10 A.M.

This meeting attracts in excess of 1,500 top executives and their wives. Examples of companies attending are McKesson & Robbins, Bergen Drug, Johnson & Johnson, Pfizer, etc.

Our last annual meeting in November we were privileged to have Dr. Henry Kissinger as our speaker and in the coming meeting we will have President Gerald Ford and Dr. Milton Friedman, Nobel prize winner for Excellence In Economics.

The future of nuclear energy has become a prime concern of American industry and of course, the people of America. Inasmuch as you are the foremost authority on this subject, we would be honored to have you address this influential and prestigious group.

Would appreciate hearing from you at your earliest convenience concerning your availability and other pertinent arrangements for joining us in Hawaii.

Best personal regards,

George R. Johnson
Vice President
