Docket No. 50-29

Yankee Atomic Electric Company
ATTN: Mr. Robert H. Groce
Licensing Engineer
20 Turnpike Road
Westborough, Massachusetts 01581

Gentlemen:

Subject: Inspection 50-29/78-19

This refers to your letter dated January 16, 1979, and the telephone call on January 24, 1979 by Messrs. St. Laurent, Staub, and Trejo of your staff, and Mr. MacDonald of Yankee Services Company, to Mr. Plumlee of this office in response to our letter dated December 22, 1978.

Thank you for informing us of the corrective and preventive actions you documented in response to our correspondence. However, your letter has been reviewed and additional information is found to be needed in response to item B, as follows.

Your letter did not identify any record of this individual's radiation exposure that, on November 6, 1978, contained all of the information required by Form NRC-5. Mr. Vandenburg's letter dated January 23, 1978, indicated that the Form NRC-5 information would be maintained in the TRAP computer record system. However, after the inspector identified a 1.22 rem error in the information input to TRAP, your letter dated January 16, 1979, requested withdrawal of this item of noncompliance, "Due to the fact that the information ... was not to be used in compiling the Form NRC-5."

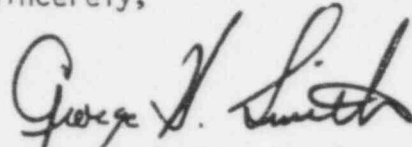

In order that we may inspect the proper records, please inform us what record on November 6, 1978, contained the above individual's Form NRC-5 information. In addition, please inform us of any records required by 10 CFR 20 that you maintain in the TRAP computer records system.

79073 10158 9

Yankee Atomic Electric Company 2

Please transmit to this office within seven (7) days of receipt of this letter a written statement containing the requested information.

Sincerely,

A handwritten signature in cursive script that reads "George H. Smith". The signature is written in dark ink and is positioned above the typed name.

George H. Smith, Chief
Fuel Facility and Materials Safety
Branch
