

July 20, 1979

Dear Mr. Denton,

Today I found a letter I meant to mail a long time ago. so I might add that I and my family still are very much anti-nuclear - I know how hard it is for people who are educated in these fields to change and say - "whoa! we are going in the wrong direction, the sun is still up in the sky. (Solar)" Please keep that calm reassuring personally and don't let the Bureaucrats pick you to pieces. I still think you did on Hell of a good job at "TMI."

Thanks 
Myrtle G. Shub
