FROM: G. Lainas, Chief, Plant Systems Branch, DOR  
SUBJECT: STEAM GENERATOR WATER LEVEL INSTRUMENTATION

Attached is a memorandum from G. Lainas to D. Eisenhut dated July 9, 1979 regarding the effect of high environmental temperature on steam generator water level instrumentation. As stated in the memorandum, I&E plans to take action to ensure that affected licensees of Westinghouse operating reactors take the appropriate actions. Further, I&E is also developing a Bulletin to pursue this matter generically for all other reactor designs. The memorandum also advised that this item be the subject of a Board Notification.
