SUBJECT: Beaver Valley Power Station Unit No. 2  
Docket No. 50-412  
IE Bulletins 78-12/12A/12B  
"Atypical Weld Material in Reactor  
Pressure Vessel Welds"

Gentlemen:

Based upon the technical evaluation by Westinghouse of the information contained in the generic report entitled "Atypical Weld Material in Reactor Pressure Vessel Welds" compiled by Combustion Engineering, Inc., dated June 8, 1979, to satisfy the requirements presented in the subject IE Bulletins, Duquesne Light Company has concluded that the weld material data and other required information pertinent to the Beaver Valley Power Station Unit No. 2 Reactor Vessel are included in the Combustion Engineering, Inc. report.

This report has been submitted to the Nuclear Regulatory Commission on June 8, 1979 by Combustion Engineering submittal letter.

Additionally, we have attached a copy of the Combustion Engineering certification letter, providing further confirmation that the generic report prepared by Combustion Engineering addresses all of the applicable materials used in the fabrication of the Beaver Valley Power Station Unit No. 2 reactor vessel.

DUQUESNE LIGHT COMPANY
