Gentlemen:

Subject: Inspection 80-01

This refers to the routine inspection conducted by Mr. J. Nicolosi of this office on October 30, 1980 of activities authorized by NRC License No. 37-13322-01 and to the discussions of our findings held by Mr. Nicolosi with Dr. Garcia of your staff at the conclusion of the inspection, and to a subsequent telephone discussion between Mr. Nicolosi of this office and your secretary on November 3, 1980.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, measurements made by the inspector, and observations by the inspector.

Within the scope of this inspection, no items of noncompliance were observed.

Based upon discussions with Dr. Garcia at the conclusion of the inspection, it is our understanding that you intend to inventory all of your generally licensed and exempt radioactive sources. We will review your action on this matter during the next inspection of your licensed program.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter will be placed in the Public Document Room.

No reply to this letter is required; however, should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

John D. Kinneman, Chief
