License No. 21-14973-01

Gentlemen:

This refers to the meeting between Mr. M. P. Phillips and Dr. C. J. Paperiello of this office and Mr. N. R. Netzel and yourself on December 31, 1980, at your Chicago office. This meeting was held to determine the source of material injected into the two disposal wells located near the Breckenridge, MI. burial site on Madison Road.

Based on this meeting, we understand that we will be contacted to split samples from the remaining uncapped injection well (well No. 2), as well as from at least one source well from each underground formation used. We further understand that this will be done sometime before the beginning of summer.

Your cooperation is appreciated.

Sincerely,

W. L. Fisher

W. L. Fisher, Acting Chief
Fuel Facility and Materials
Safety Branch
