Re: Byproduct Material License 47-19164-01
RII:R 9

Dear Sir:

It has come to our attention that some confusion has arisen out of our response to your R. A. Brown's inspection on October 16, 1980 and your letter of November 10, 1980.

To correct the infraction of Condition 12, of our license, we sent a request for an amendment to our license to your Washington, D.C. office on October 27, 1980.

This request was reviewed by Mr. Michael E. Wangler who on November 20, 1980, asked us for further information for the amendment.

On December 4, 1980, we responded to Mr. Wangler's letter with a change in our request for amendment which should satisfy the conditions he indicated.

We regret that you have not been informed of these corrective steps we have taken and hope this letter will suffice to bring you up to date.

We intend to avoid any further noncompliance in the future by amending our license immediately should our designated Radiation Protection Officer leave our employment. We, also, plan to send other of our employees to an applicable device-manufacturers training program so that they also may be qualified as authorized individual users of our gauge and may have their names added to our license.

We expect to achieve full compliance with our license as soon as our December 4, 1980 request for amendment is accepted.

We are enclosing one copy of each of the letters indicated above for your information.

Should you have any further questions or comments on this matter, feel free to contact us.

Sincerely,

William T. Babcock
Project Manager
