Mr. Eugene A. Trager  
Uranium Mill Licensing Section  
U.S. Nuclear Regulatory Commission  
7915 Eastern Avenue  
Silver Spring, MD 20910

Dear Mr. Trager:

Transmitted herewith are further revisions to Energy Fuels Nuclear's Application for a Source Material License, which was submitted earlier in revised form on September 26, 1978. These pages have been prepared for direct insertion into the Application, either as additions or as replacements for existing pages. Each page is marked with a revision date at the bottom and vertical bars in the margin to indicate where changes, additions or deletions have been made.

We elected not to make any changes in Section 2.0 because the information is updated adequately by the Final Environmental Statement. Appendix B has been deleted, and a new Appendix G has been added.

In Sections 3.0 and 4.0, information has been added to include the Blanding Ore Buying Station (OBS) in the license application. As such, it is expected that the Source Material License for the White Mesa Project will include the OBS, even though an application for the OBS was submitted separately.

We have made a conscientious effort to include changes and revisions suggested at our meeting on June 29. We request that you review this submittal promptly and advise us if additional information is needed. Otherwise, we believe the preparation and approval of the Safety Evaluation Report (SER) can now proceed, and that the Source Material License can be granted in the very near future.

Sincerely yours,

C. E. Baker, Environmental  
& Licensing Director
