Nuclear Regulatory Commission

1717 Hst. N.W.

Washington, D.C.

To whom it may concern,

Nuclear accidents can happen. Richard Thornburgh, Governor of Pennsylvania, had recently encouraged the evacuation of all pregnant women and children under age five.

We the undersigned citizens of the United States demand: an immediate nuclear moratorium and the shut down of all nuclear power plants. We can't afford another accident.

" An answer to the world's energy Crisis arises every morning at the break of dawn. "
