Mr. James G. Keppler, Director
U.S. Nuclear Regulatory Commission
Region III
Inspection and Enforcement
799 Roosevelt Road
Glen Ellyn, Illinois 60137

Dear Jim:

Attached is a table showing the number of technical graduates in the Tech Staffs at our various stations, and the average years of service for those people. This is information we have been following since 1975, when we began to add significant numbers of people to meet increasing regulatory requirements, as well as preparing to staff LaSalle, Braidwood, and Byron Stations. Considering the significant increase in graduates assigned to the station and considering the number of people from the stations that have been added to the Engineering Department, once again to meet increasing regulatory requirements and workload, I believe our efforts have paid off. Since our technical graduate manning is virtually complete, we should make significant progress in experience over the next several years.

If you have any questions on the information, please give me a call.

Sincerely,

Byron Lee, Jr.
Vice-President
