Attn: Ms. Elaine Hemby

POOR ORIGINAL

Dear Ms. Hemby:

Please refer to our previous letters and telephone discussions regarding the shipment of Nuclear Density Devices to the People's Republic of China.

We have now been favored with a firm order and letter of credit, under our file E-45262, to ship six of our Model NIC-5DTM Meters.

We presently hold Export License XB-881, as per copy attached, authorizing the export of these meters to certain countries. In addition, we are enclosing a copy of our latest brochure on these devices which may assist in securing the necessary authorization to complete this order for PRC.

Since these units are available, and we are anxious to complete this first transaction, we would appreciate any urgency that you can give to this request.

Thank you in advance for your cooperation.

① Add PRC as add'l ultimate consignee

Very truly yours,
 SOILTEST INTERNATIONAL, INC.
