JUL 18 1979

Babcock & Wilcox Company
Power Generation Division
ATTN: Mr. D. W. Zeff, Manager
Nuclear Materials
P. O. Box 1260
Lynchburg, Virginia 24505

Gentlemen:

During our recent visit to your site on June 19, 1979 it was noted that former License Condition 4.12, which was transmitted in our letter to you dated December 21, 1978, had been inadvertently omitted. Since the current Material and Plant Protection Amendment to your license has been revised, former License Condition 4.12 has been renumbered 4.10 and is hereby included in the current amendment.

License Condition 4.10 reads as follows:

"Notwithstanding the requirements of 10 CFR 70.58(i)(2), scrap and waste in the form of contaminated oil which was locally generated prior to December 31, 1978 and which was measured to an uncertainty exceeding + 10% shall be disposed of not later than December 31, 1979."

We regret any inconvenience caused by this omission.

Sincerely,

James G. Partlow, Chief
Material Control & Accountability
Licensing Branch
Division of Safeguards
