

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

Mr. John J. Munro, III
Tech/Ops, Radiation Products
Division
40 South Avenue
Burlington, Massachusetts 01803

Dear Mr. Munro:

This is in reference to your letter of April 15, 1977, petitioning the Commission to amend 10 CFR Part 34.21 with regard to surface radiation level limits for radiographic exposure devices. Your petition was docketed as PRM-34-1.

The NRC staff, after careful consideration of your petition, has concluded that adoption of changes proposed in your petition would lead to difficulties for licensees without a corresponding benefit in improved public health and safety. For these reasons and others set forth in the enclosed Federal Register Notice, your petition is denied.

Sincerely,

(Signed) Lee V. Gossick

Lee V. Gossick
Executive Director for Operations
