Docket No. 50-471

POOR ORIGINAL

Mr. W. Griffin
Boston Edison Company
General Offices
800 Boylston Street
Boston, Massachusetts 02199

Dear Mr. Griffin:

As you and Mr. Levine of the Meteorology Section discussed last week, we are enclosing the NRC direction dependent accident program in punched card form for your use in evaluation of the Pilgrim-2 exclusion area offshore direction boundaries. In addition, a card listing, sample run, and brief description for running the program are included. The magnetic tape you sent us will be returned as soon as the program is copied on it at the Brookhaven National Laboratory, hopefully within one week. In the interim, I expect the cards and program listing will allow you the opportunity to evaluate proposed offshore exclusion area boundaries at the Pilgrim site. Should you have any questions regarding the program and the model please contact myself at 301-492-8124 or J. Levine at 301-492-8018.

Sincerely,

Original Signed by
Earl H. Markee, Jr.

Earl H. Markee, Jr., Leader
Meteorology Section
Hydrology-Meteorology Branch
Division of Site Safety and
Environmental Analysis

Enclosure:

- 1. Card Listing
- 2. Program running instructions
