July 18, 1979
GQL 0909

Mr. B. H. Grier, Director
Office of Inspection and Enforcement
Region 1
U.S. Nuclear Regulatory Commission
631 Park Avenue
King of Prussia, Pennsylvania 19406

Dear Sir:

Three Mile Island Nuclear Station, Units 1 and 2 (TMI-1 and TMI-2)
Operating License No. DPR-50 and DRR-73
Docket No. 50-289 and 50-320
Radiation Protection Program

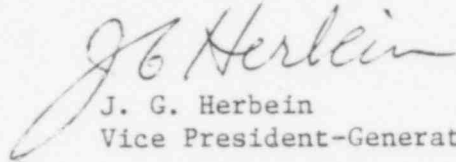

1. By August 3, 1979, Met-Ed will:
 - a. Provide a description of the organizational changes in the Radiation Protection Program at the Three Mile Island Station.
 - b. Provide a definition of the functional areas of the Radiation Protection Program and the specific responsibilities associated with each.
 - c. Identify the individuals responsible for each functional area and the lines of responsibility for the Radiation Protection Program within the Metropolitan Edison Company organization.
 - d. Provide a definition of the geographical areas of responsibility for the Radiation Protection Staff assigned to Unit 1 and Unit 2.
2. By August 15, 1979, Met-Ed will review the adequacy of the current QA program as it relates to providing for regular audits of the Radiation Protection Program by individuals who are independent of day-to-day radiological protection activities.
3. By August 3, 1979, Met-Ed will review and re-issue written procedures for control of high radiation areas. These procedures will include specific steps for control of keys for such areas and a surveillance program for identifying new high radiation areas and for ensuring that such areas are properly controlled.
4. By August 3, 1979, Met-Ed will issue a procedure containing written criteria for evaluating air sample results with respect to beta gamma ratios and beta energies.

904172

5. By July 27, 1979, Met-Ed will review adequacy of existing requirements for our bioassay program, and by August 17, 1979, Met-Ed will have implemented revised procedures as necessary to assure a comprehensive bioassay program.
6. By August 17, 1979, Met-Ed will review and implement necessary changes to the procedures which define the program that evaluates the potential exposure of individuals to concentrations of airborne radioactive materials as required by 10 CFR 20.201(b).

Sincerely,

J. G. Herbein
Vice President-Generation
