6/20 ACTION
Clark
(NRG PUBLIC DOCUMENT ROOM)

JUN 13 1979

Mr. Norman Haller, Director
Office of Management and
Program Analysis
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Haller:

I previously transmitted to you the report CE-FBR-78-380, "Homogeneous Carbide Fueled Cores for the Proliferation Resistant LMFBR Core Design Study" dated August 24, 1978 as part of the information describing NASAP alternatives. The report bears a legend on its cover which restricts distribution to Combustion Engineering (CE); DOE; and DOE contractors who need the report to perform work required by CE or IOE.

John Clark of your staff asked whether this report could be reproduced for NRC files and also placed in the Public Document Room. I have verified that the responsible DOE office and Combustion Engineering have no objection, providing the report is understood to be a preliminary study which is subject to change.

Sincerely,

Edward J. Hanrahan, Director
Division of Nuclear Alternative
Systems Assessment, ETN

INFORMATION CONCERNING USE OF THIS DOCUMENT

CONTROLLED DISTRIBUTION DOCUMENT

This is a working document required for internal C-E use and program distribution in order to perform, direct or integrate the work of the LMFBR program. Distribution is limited to C-E, DOE and DOE contractors who require the document in order to perform work required by C-E or DOE. Its contents should not be published, further disseminated, or used for other purposes until approval for such release or use has been secured from C-E.

PATENT STATUS

This document, transmitted in advance of patent clearance, is made available in confidence solely for use in performance of work under contracts with the U.S. Department of Energy (DOE). It is not to be published nor its contents otherwise disseminated or used for purposes other than specified above before patent approval for such release or use has been secured from the cognizant assigned DOE patent group.

NOTICE

This document was prepared as an account of work sponsored by the United States Government. Neither the United States nor the United States Department of Energy, nor any of their employees, nor any of their contractors, subcontractors, or their employees, makes any warranty, express or implied, or assumes any legal liability or responsibility for the accuracy, completeness or usefulness of any information, apparatus, product or process disclosed, or represents that its use would not infringe privately owned rights.

PRELIMINARY DOCUMENT

This document contains information of a preliminary nature in the course of work under a DOE Contract. This information is subject to correction or modification upon the collection and evaluation of additional data.
