Scanning Services of America  
Suite 220  
917 - 19th Street  
Washington, D.C. 20006

August 16, 1979

Dear Sir,

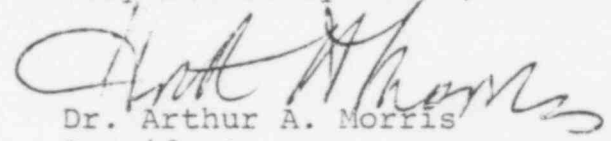

Thank you for your communication of August 10, 1979.

Please be informed that Scanning Services of America has not begun operation as yet, and therefore, we have not handled any radioactive materials under any conditions at any time.

In view of the likely-hood of our opening our services for nuclear substances in Scanning Services of America, you may want to temporarily suspend our license. We have struggled long and hard to get into operation, but are finding insurmountable difficulties in completing our program.

You have been extremely helpful to us in the past, and very tolerant of our ability to get into operation. We want to thank you for your help.

Very Sincerely Yours,

Dr. Arthur A. Morris  
President  
Scanning Services of  
America

AAM/dd
