Item No. 042

Dear Ms. Wright:

Please find enclosed an application for License to export Nuclear Material described as - One Hundred Twenty (120) - Millicuries of Polonium - 210, contained in six (6) Model 906 Ionizing Air Nozzels, manufactured by 3-M Company, 3-M Center, Saint Paul, Minnesota 55101.

End use of commodity is to ionize air to eliminate static charge used in cleaning mount parts used in the production of color television picture tubes per our equipment supply contract 73/78606, with V/O Licensentorg of the U.S.S.R., effective June 21, 1978.

Also attached are two copies of associated literature pertaining to the described commodity.

If I can be of any assistance in expediting the processing of this application, please feel free to contact me.

Your cooperation and efforts in this matter are greatly appreciated.

Leon Bruce
Administrator,
Export Licensing
