VICE PRESIDENT  
TECHNOLOGY AND PLANNING

34-01308-07

Mr. James G. Keppler  
United States Nuclear Regulatory Commission  
Region III  
799 Roosevelt Road  
Glen Ellyn, Ill. 60137

Dear Mr. Keppler:

This letter is in reply to IE Bulletin No. 79-19 issued August 10, 1979. In our current operations we do not generate low-level radioactive waste. Our only activity in the last 6 months was disposal of piston rings irradiated with Fe 55. This was done by Teledyne Isotopes, 50 Van Buren Ave, Westwood, NY. 07675 on March 30, 1979. Total activity was 1.0 mCi.

I trust that this fulfills our obligations with regard to this bulletin.

Sincerely yours,

*W T Wotring*  
W. T. Wotring
