Mr. Dean Marietta
2915 Henderson Drive
Cheyenne, Wyoming 82001

Dear Mr. Marietta:

We have not yet completed our investigation of the Three Mile Island accident. However, in response to your request, I am enclosing some pages taken from a report concerning feedwater transients which describes the general sequence of events during the accident.

As a strictly regulatory agency, we have not prepared booklets and pamphlets on general subjects related to nuclear energy. I am enclosing a copy of our latest annual report which will provide you with information on our various activities.

Sincerely,

/s/

Clare Miles (Miss)
