Dear Mr. Schramm:

Your letter of June 29 to the Department of Energy has been referred to this office for response.

The NRC has published a report NUREG-0568, "Title List of Publicly Available Documents - Three Mile Island Unit 2," Docket 50-320. I enclose a complimentary copy for your use. Instructions for obtaining the documents, many of which may be purchased, will be found on page VI of the preface to the report.

Also enclosed are copies of the memorandum and the report requested in your letter.

I hope the Regulatory Guides and other information on TMI-2 sent to you on February 14 and May 31 have been useful in your studies.

Sincerely,

Original signed by  
Joseph D. Lafleur, Jr.

James R. Shea, Director  
Office of International Programs

Enclosures:

1. NUREG-0568
2. Memo, T. Novak to RSB Members, dated 1/10/79
3. Report, "Decay Heat Removal During a Very Small Break Loca for B&W 205-Fuel-Assembly PWR," C. Michelson, January 1978

Dear Mr. Schramm:

Your recent letter to the Department of Energy expressing concerns about several commercial nuclear reactors has been referred to this office for reply.

Inasmuch as these matters are under the cognizance of the Nuclear Regulatory Commission, we are forwarding your letter to them for appropriate action by copy of this letter.

Sincerely,

  
J. P. Thereault, Deputy Director  
Plans and Analysis Division  
Office of Nuclear Energy Programs

USA

Dear Sir,

I am studying physics at the university of Hamburg and I am specially interested in nuclear- and reactor-physics and nuclear techniques. Out of this reason I am very interested in exact informations to the events in the reactor TMI-2 near Harrisburg.

So it is perhaps possible for you to send me detailed informations to the events in the reactor, to the measurements in the environment and to the public reactions.

Beside to these informations I am interested in two articles from which I hope, that you can send them too.

- Report of Carl Michelson (Tennessee Valley Authority) to faults in the pressurizer-level-indicator in the plant David Besse, from January 1978
- Memorandum of Thomas M. Novak (NRC) from 10.1.1978 to the same weak points in primary coolant rods and pressurizers of B&W-reactors (David Besse)

I would be very glad if you could send these informations and the two articles.

sincerely
