Buffalo, NY 14215

REGULATORY DOCKET FILE COPY

Dear Mr. Jackson:

Your recent letter to the NRC posed several questions about nuclear power plants in the United States. Your questions have been summarized below and a response has been provided.

Question: Could something like Three Mile Island happen again?

Answer: It is impossible to say that the Three Mile Island accident will never be repeated.

Question: Could you send a map of the nuclear power plants in the United States?

Answer: The NRC does not have a publication like that. However, the magazine "Nuclear News" recently (February 1979) published a list of all the nuclear power plants in the United States. You should be able to get a reprint of this article from them. The mailing address for "Nuclear News" is: Nuclear News, 555 N. Kensington Avenue, LaGrange Park, Illinois 60525.

Question: Does NRC have any pamphlets on nuclear power?

Answer: The NRC does not have any such pamphlets.

We trust that you will find our answers beneficial.

Sincerely,

Original Signed by
H. R. Denton

Harold R. Denton, Director
Office of Nuclear Reactor Regulation
